For Topical Dermatological and External Use Only

CREAM

NON-COMEDOGENIC
PARABEN FREE

Symptom relief for atopic dermatitis, allergic contact dermatitis, and radiation dermatitis

INDICATIONS FOR USE

Under the supervision of a health care practitioner, Hylatopic Plus[®] cream is indicated to manage and relieve the burning, itching and pain experienced with various types of dermatoses, including atopic dermatitis, allergic contact dermatitis and radiation dermatitis. Hylatopic Plus[®] cream also helps to relieve dry, waxy skin by maintaining a moist wound and skin environment, which is beneficial to the healing process.

CONTRAINDICATIONS

Hylatopic Plus[®] cream is contraindicated in persons with a known hypersensitivity to any of the components of the formulation.

WARNINGS

Use only as directed.

Keep out of the reach of children.

Avoid contact with eyes. **For topical use only.** Not for ophthalmic use. Do not apply within four hours prior to a radiation session.

PRECAUTIONS AND OBSERVATIONS

- Hylatopic Plus[®] cream does not contain a sunscreen and should not be used prior to extended exposure to the sun.
- If clinical signs of infection are present, appropriate treatment should be initiated; use of Hylatopic Plus[®] cream may be continued during the anti-infective therapy.
- If the condition does not improve within 10 – 14 days, consult a physician.
- Hylatopic Plus[®] cream may dissolve fuchsin when this dye is used to define the margins of the radiation fields to be treated.

INSTRUCTIONS FOR USE

Dispense Hylatopic Plus[®] cream into palm of hand and apply to affected area 3 times per day, or as directed by a physician. Massage gently into the skin until completely absorbed. If the skin is broken, cover with appropriate dressing.
